

TECHNICAL SUMMARY:

Integrated Procedures Trainer:	Training Device: Airbus A320 IPT
	Simulator Manufacturer: CAE
	Qualification Standards: Designed to meet FAA Part 60 Level 4 and EASA CS-FSTD(A) FTD Level 1 flight training device (FTD)
	Location: Singapore
Purpose:	Airbus procedural and familiarization training tool
	Train on a range of normal and abnormal procedures
Features and Capabilities:	1:1 size ratio
	Simulated systems derived from Level D full-flight simulator
	Dual rehosted flight management computer (FMC)
	Simulated tactile panels (e.g., glareshield, multi-function control and display units [MCDUs], cursor control device [CCD], etc.)
	Capability to load customer's own aircraft diskettes for NAV database update
	Instructor operator station (IOS) as per CAE FFS
	Lesson plan studio (LPS) as per CAE FFS
	Aircraft reposition
	Flight and maintenance training malfunctions
	Active aircraft system schematics
Audio – aircraft warning
